

## PRODUCT DESCRIPTION

---

Rosco, the original innovator of safe, water based fog and smoke fluids, now brings that same attention to quality and safety to Bubble Fluid.

Rosco Bubble Fluid is a premium, universal solution suitable for use in all bubble machines. This purpose engineered formula creates the maximum density of brightly iridescent bubbles that fly higher and float longer than other fluids. And most importantly, these bubbles remain dry and will not create a slippery residue.

This water based fluid will not stain hair or clothing nor sting patrons eyes and is easily cleaned up with soap and water.

Available in gallons and 55 gallon drums.
